# 1 – Activator

Brain

Hormone

Metabolism

1 – Activator is a groundbreaking formula designed to boost the effectiveness of other products by enhancing cellular receptivity to their therapeutic effects. Known as a “universal product enhancer,” it amplifies the impact of any health protocol by supporting the hypothalamus— the body’s regulatory hub for metabolism, immunity, and neuroendocrine functions. As formulator Doc Wheelwright described, 1 – Activator provides “nourishment for the CEO of the body’s autonomic functions,” helping optimize overall healing and performance.

## Health Indications

- Nutritional enhancement of normal cellular metabolic processes
- Magnify the impact of a companion formula
- Provide nutritional elements to support the normal hypothalamic regulation of body processes

## Instructions

Take 2 capsules daily, or as directed by your health care professional.

## Key Ingredients

### **RNA/DNA hypothalamus cellular identity factors**

---

Hypothalamus RNA/DNA cellular factors provide targeted nutritional support to the hypothalamus, the body's command center for regulating functions like blood pressure, mood, sleep, and appetite. These factors deliver "renewal" codes that enhance cellular self-repair processes, promoting more youthful and efficient cellular responses.

### **RNA/DNA thymus cellular identity factors**

---

Thymus RNA/DNA cellular factors rejuvenate the thymus gland, boosting immune and lymphatic system performance. By supporting thymic hormone production, these factors enhance T-cell function, balance endocrine activity, and improve the body's overall immune response.

### **RNA/DNA adrenal cellular identity factors**

---

Adrenal nucleic acids nourish the adrenal glands, vital for managing stress, supporting autonomic functions, and regulating metabolism. By supporting the production of hormones like cortisol and adrenaline, they promote mineral utilization, immune balance, and recovery from stress, optimizing the body's innate healing processes.

### **Paprika (herb)**

---

Paprika (*Capsicum annuum*) enhances circulation, heart health, and immune function through its rich supply of essential vitamins and minerals. This natural anti-inflammatory supports glucose balance, vision, and healthy blood and lipid utilization, amplifying the effectiveness of nutritional strategies.

## Warnings/Contraindications

Not recommended for individuals with phenylketonuria (PKU), a rare genetic disorder that prevents the body from properly processing phenylalanine, which can build up and cause serious health issues. Do not use if you are taking L-Dopa (levodopa), a prescription medication typically used for Parkinson's disease, as this may cause adverse interactions.

**\*\***It is always recommended that you consult your practitioner prior to adding any new supplement to your regimen if you are pregnant, breastfeeding, experiencing renal failure, undergoing an organ transplant(s), managing diabetes with insulin, or are taking medication(s) for any pre-existing conditions. **\*\***

## Safety

All ingredients are tested before use for:

- Pathogenic microbial contaminants
- Heavy metals and/or chemical contaminants
- Purity

## Additional Information

- Gluten Free
- Non-GMO
- cGMP Facility
