5 – Stabilizer

Hormone

Brain

Metabolism

5 – Stabilizer is a cutting-edge cellular support formula designed to promote stable, error-free cell reproduction and protect against genetic mutations. Packed with powerful nutrients like allantoin, rose hips, bone broth, and green-lipped mussel, it helps maintain DNA and RNA integrity during mitosis. Ideal for pairing with other Systemic Formulas or Alimentum Labs formulas that are designed to target specific tissues, 5 – Stabilizer enhances cellular identity and resilience, supports telomere health, and fortifies the body's natural repair processes—essential for vibrant, youthful tissue and optimal whole-body wellness.

Health Indications

- Supports healthy cellular replication and DNA/RNA integrity
- Helps maintain cellular resilience during times of physiological stress
- Promotes normal tissue repair and regeneration processes
- Provides nutritional support for the body's natural defense against oxidative and environmental stressors

Instructions

Take 3 capsules daily, or as directed by your health care professional.

Key Ingredients

Allantoin

Allantoin, a natural compound derived from the comfrey plant, supports youth-preserving cellular processes by stimulating fibroblast activity and promoting the production of healthy collagen. By enhancing tissue repair and strengthening the extracellular matrix, allantoin helps maintain structural integrity during cell replication, reinforcing 5 – Stabilizer's role in supporting stable, error-free cellular reproduction and long-term cellular health.

Rose Hips

Rose hips deliver a rich spectrum of natural vitamin C, vitamin A, polyphenols, and essential minerals that protect against oxidative stress and support the regeneration of healthy tissue. Their collagen-strengthening properties, combined with immune-modulating and antioxidant effects, help maintain cellular integrity and resilience. Together, these bioactive compounds in rose hips enhance 5 – Stabilizer's ability to support stable cell replication, tissue repair, and long-term cellular health throughout the body.

Bone Broth

Bone broth provides a concentrated source of collagen, glutamine, glycine, and fat-soluble vitamins that nourish the immune system, support intestinal lining integrity, and promote tissue regeneration. Its anti-inflammatory peptides and joint-supportive compounds, such as glucosamine and linoleic acid, help reduce systemic inflammation and strengthen structural tissues. These nutrients support stable cellular renewal, promote gastrointestinal resilience, and reinforce the body's natural repair mechanisms essential to the function of 5 – Stabilizer.

Green-Lipped Mussel

Green-lipped mussel protein delivers highly bioavailable amino acids and peptides that support cellular rejuvenation, tissue repair, and structural integrity. Known as a nutritionally complete “miracle food,” its anti-inflammatory and restorative properties help maintain healthy cellular function and support the body’s natural healing processes central to 5 – Stabilizer’s role in promoting stable cell replication.

Thalamus and Brain RNA/DNA Tissue Factors

Thalamus and Brain RNA/DNA tissue factors provide critical support for the structural integrity and cellular identity of brain tissue, particularly within the thalamus, which plays a central role in regulating sensory processing, motor signals, and consciousness. By supplying foundational nucleic acids that help sustain and stabilize genetic activity in brain cells, these factors help maintain smooth neural communication and cognitive functions such as memory, focus, and emotional regulation. This targeted nucleic acid support contributes to 5 – Stabilizer’s ability to promote neurological resilience and protect against the cellular instability associated with cognitive decline.

Warnings/Contraindications

When used as directed there are no known contraindications for 5 – Stabilizer.

******It is always recommended that you consult your practitioner prior to adding any new supplement to your regimen if you are pregnant, breastfeeding, experiencing renal failure, undergoing an organ transplant(s), managing diabetes with insulin, or are taking medication(s) for any pre-existing conditions.******

Safety

All ingredients are tested before use for:

- Pathogenic microbial contaminants
- Heavy metals and/or chemical contaminants
- Purity

Additional Information

- Gluten Free
- Non-GMO
- cGMP Facility
