K

Kidney

Detox

Hormone

Whole Body

K – Kidney delivers comprehensive nutritional support for the kidneys and entire urinary system, including the bladder, ureters, and urethra. This expertly formulated blend promotes kidney tissue integrity while supporting vital functions such as blood filtration, pH regulation, electrolyte balance, and red blood cell production. Drawing from both traditional herbal practices and modern nutritional science, K – Kidney helps maintain renal health, supports natural detoxification, and reinforces the body's core systems involved in circulation, structural health, and cellular energy. A foundational formula for long-term urinary system wellness.

Health Indications

- Supports Kidney Tissue Integrity While Enhancing Natural Filtration Processes
- Helps Maintain Proper Hydration and Balanced Electrolytes for Metabolic Health
- Enhances The Kidneys' Ability to Clear Toxins and Metabolic Waste Efficiently
- Supports Healthy Bladder Tone and Urinary Tract Function to Reduce Discomfort
- Promotes Erythropoietin Production for Healthy Red Blood Cell Formation and Oxygen Delivery

Instructions

Take 2 capsules daily, or as directed by your health care professional.

Key Ingredients

Kidney, Adrenal, and Thalamus RNA/DNA Tissue Factors

Kidney, adrenal, and thalamus RNA/DNA tissue factors provide targeted nucleic acid support that nourishes cellular communication and structural integrity within the renal and endocrine systems. These bioactive compounds contribute to tissue regeneration, stabilization of metabolic activity, and reinforcement of organ-specific function. By enhancing intracellular signaling and repair, they create a resilient foundation for optimal filtration, fluid regulation, and systemic balance throughout the urinary and adrenal pathways.

Cha de Bugre

Cha de bugre is a South American herb known for supporting healthy fluid balance and cardiovascular function. Rich in allantoin and essential fatty acids, it promotes gentle diuretic activity and helps maintain the integrity of cellular membranes. By aiding in the natural elimination of metabolic waste and modulating inflammatory responses, cha de bugre reinforces key processes that contribute to optimal kidney performance and overall urinary system health.

Buchu

Buchu is an herb traditionally used to support urinary tract health and promote internal cleansing. Its natural compounds, including flavonoids and essential oils, help flush excess uric acid and maintain microbial balance within the urinary system. Known for its mild diuretic and soothing properties, buchu supports the body's natural detoxification pathways, creating a clean, stable environment for healthy kidney and bladder function.

Gelatin

Gelatin is a concentrated source of amino acids—such as glycine and proline—that are vital for maintaining the structural integrity of kidney tissues. These compounds support collagen synthesis, which helps strengthen the connective matrix within the kidneys. By reinforcing the physical resilience of renal tissue and aiding in cellular repair, gelatin helps preserve the kidneys' ability to filter waste, regulate fluid balance, and maintain overall functional stability.

Cleavers Herb

Cleavers herb is traditionally used to support lymphatic and urinary health by promoting gentle detoxification and fluid movement throughout the body. Its bioactive compounds, including flavonoids and coumarins, help soothe irritated tissues and encourage the natural drainage of waste. By supporting healthy bladder tone and microbial balance, cleavers contributes to a stable internal environment, laying the groundwork for optimal renal and urinary tract function.

Warnings/Contraindications

When taken as directed, there are no known contraindications for K – Kidney. However, this formula contains fish (fish liver oil) and should be avoided by individuals with known fish allergies.

****It is always recommended that you consult your practitioner prior to adding any new supplement to your regimen if you are pregnant, breastfeeding, experiencing renal failure, undergoing an organ transplant(s), managing diabetes with insulin, or are taking medication(s) for any pre-existing conditions.****

Safety

All ingredients are tested before use for:

- Pathogenic microbial contaminants
- Heavy metals and/or chemical contaminants
- Purity

Additional Information

- Gluten Free
- Non-GMO
- cGMP Facility
